51

Diagram illustrating a 1D lattice structure with sites labeled $i, i+1, i+2, \dots, i+5, i+6$. The sites are represented by gray boxes. The site at $i+1$ is labeled with a triangle symbol Δ . The site at $i+2$ is labeled with a psi symbol ψ . The site at $i+5$ is labeled with a lambda symbol λ . The site at $i+6$ is labeled with a chi symbol χ . The site at i is labeled with a vertical bar and i .

2

A schematic diagram of a 2D hexagonal lattice. The lattice is composed of solid black circles representing atoms. A central atom is highlighted with a larger radius. A dashed line connects this central atom to one of its nearest neighbors. The lattice is bounded by a dashed line on the right side.
